

Year 10 Set 6,

Week beginning 6th July

Topic – This week we will continue to look at past papers. We would have been doing this on the run up to your first full paper that you would have been doing at the end of Y10.

This week I will ask you to try complete a full past paper from Edexcel June 2019. This is the level of maths you will be asked to do in June 2021. Papers are easier at the start and then get more difficult,

This consists of 3 papers. Paper 1 is non calc and P2 and P3 are calc. There are 80 marks on each paper so that is 240 marks in total.

Each paper lasts for 1hr 30min so there is lots to do.

Each question has my video solution attached so you can check the answers.

Here are the Grade boundaries

Grade 5 184/240

Grade 4 149/240

Grade 3 111/240

Grade 2 73/240

Grade 1 36/240

Time 4hrs 30min

Ask questions if needed on google classroom
